

Product Overview

The GBU range of the traditional solution to tree support is provided from stock. The belt is designed with a nylon reinforcing giving ultimate lifespan and resistance to the most severe conditions. While GBU recommends avoiding damage to the rootball through penetration by a stake, this is a cost-effective system we would suggest is best suited to smaller trees in a soft landscape scenario. The biodegradable product is a long-time favourite with landscapers.

Features and Benefits

-  Belt nylon reinforced for ultimate lifespan
-  Cost effective
-  Traditional solution for peace of mind

Maintenance

-  Periodic inspection adjustment as required

Technical Specification

GLB25B	25mm nylon reinforced rubber belt 10mtr roll
GLB35B	35mm nylon reinforced rubber belt 10mtr roll
GLBB45A	450mm rubber buckled belt 25mm wide
GLBB60A	600mm rubber buckled belt 25mm wide
GLPAA	Standard rubber pad for 25mm belt
GLPAAA	Standard rubber pad for 35mm belt
GLPFA	300mm plastic sleeve for 25mm belt
GLPFFA	300mm plastic sleeve for 35mm belt
GLNTA	Naturetie - biodegradable hessian tree tie
